

XTREME WHEELS™

Friction Drive Wheel Kit for Blaw-Knox* Pavers

***The Revolutionary Cost Saving Solution for
Extending Rubber Track Performance***

XTREME WHEELS™

- *Increases productivity by providing up to 2 times more rubber track life*
- *Reduce replacement costs by allowing the use of a smaller lug reinforcement rubber track*
- *Minimizes downtime and maintenance schedule*
- *Resistant to oils, UV, diesel fuel and more*
- *Simple Installation*

XTREME WHEELS™

Double Your Rubber Track Life

Minimizes Downtime & Maintenance Schedule - No more replacing drive wheels from worn or broken drive bars. Asphalt trapping between drive wheel and rubber track issue can be eliminated with a simple adjustment.

Provides Maximum Work-Life - Eliminates impact force between drive bar and track lug found in positive cog drives, extending rubber track work-life by up to 2 times and providing smooth operation.

Resist all the Elements - Proprietary long lasting rubber compound is resistant to UV light and oils in paving applications.

Reduce Replacement Costs - New Design that allows the use of a rubber track with smaller lug reinforcement - costing up to 50% less per track.

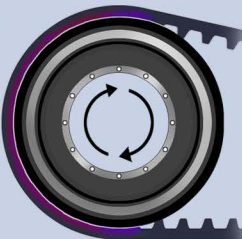

Simple & Quick Installation

1. Fits existing planetary without any modifications
2. Install inner half, mount the track, install the outer half of the wheel.
3. Use same lug nuts from the positive cog drive wheel.
4. Tension the same as you would a positive cog drive.

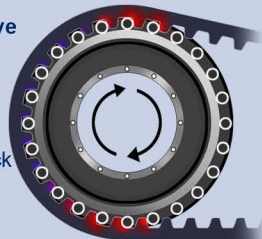

Detailed Step by Step instructions are included with each order.

Friction Drive Vs. Positive Cog Drive

Friction Drive allows track to dissipate stress to over 50% of the wheel surface area - also, with no drive bars, track lugs stay damage free, increasing track life.

Positive Cog Drive creates stress points on only the engaging & disengaging track lugs - causing track failure & 'bouncy' operation.

Continuous Rubber Tracks Available

High quality Bridgestone® rubber tracks, designed specifically for the Xtreme Wheels™ Friction Drive System are available to give you the maximum number of hours, at lowest cost per track.

Available Blaw-Knox* PF-4410 & PF-5510 Kits

Complete Undercarriage

- 2 Friction Drive Wheels
- 2 Rubber Tracks
- 24 Bogie Press-on Tires
- 4 Idler Press-On Tires
- **Extra 10% Discount**

Maintenance Package

- 2 Friction Drive Wheels
- 2 Rubber Tracks
- 6 or more Replacement Bogies
- **Extra 5% Discount**

Components

Blaw-Knox* PF-5510

- Polyurethane Bogie Press-on OEM Part# 05044-156-00
- Polyurethane Idler Press-on OEM Part# 05044-157-00
- Rubber Friction Drive Wheel OEM Part# (N/A)

Blaw-Knox* PF-4410

- Polyurethane Bogie Press-on OEM Part# 05044-160-00
- Polyurethane Idler Press-on OEM Part# 04787-295-00
- Rubber Friction Drive Wheel OEM Part# (N/A)

Xtreme Wheels™ For Rubber Tracked Bogies & Idlers

Worn, old or failed bogies & idlers can be sent in for retreading with our high-performance polyurethane compound that provides **up to 4 times more wheel wear-life** than most OEM replacements or new Xtreme Wheels™ bogies & idlers are available for immediate shipment. Xtreme Wheels™ are backed by the industry's only **No Bond Failure Guarantee****.
