STRONG DEPENDABLE SOLUTION

ROLL OUT PALLET

Innovate with the roll out pallet

Amongst the different elements of handling and storage equipment that we've developed, we have the **Roll Out Pallet**. This product responds to your reality by increasing execution speed all the while optimizing space and safety. Your inventory is a crucial element in the production process, and its importance is paramount. As a result, the Roll Out Pallet will easily give access to your material and greatly facilitate the gathering process and management of your inventory. Hence, the Roll Out Pallet units are durable and well suited to your handling and storage needs.

Capacity: 1,000 lbs UDL Other

FLOOR MOUNTED ROLL OUT PALLET

Keep it even more accessible: Floor mounted Roll Out Pallet

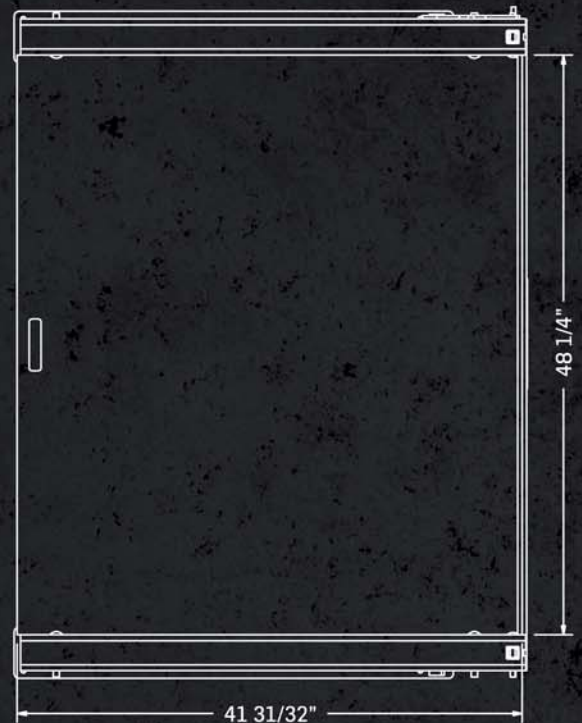

Hand picking is now made easier with the **Roll Out Pallet** installed directly on the floor and sliding the material out of the rack. Safe and efficient they roll on tracks installed on the floor so no one can take them out of the place. Made out of thick steel and heavy duty rollers, they withstand the harshest environments. The standard brake system securely holds the Roll Out Pallet in place when the lift is loading it. No more dangerous handling. Additionally, since you no longer need to crawl under to access your material, you can gain the extra space by lowering first level of beams.

OUR STORAGE STRUCTURES

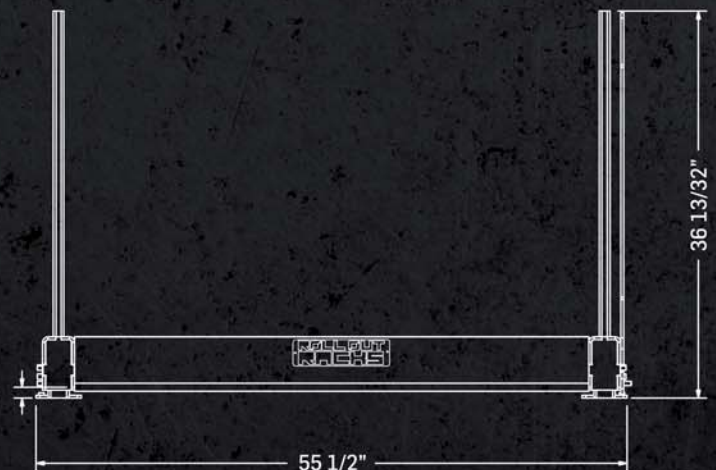

- ✓ Maximum capacity: 2,500 lbs per unit
- ✓ Extension: 95%

CANTILEVER RACK

Free space, gain storage

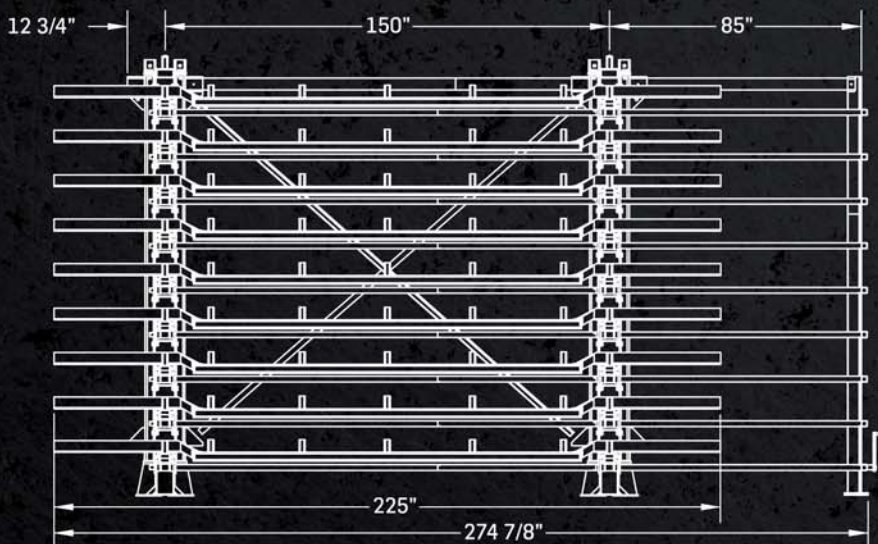

The Roll Out Cantilever Racks allows you to store long materials inside a drawer system. With these racks, you will not only be able to free up to 50% of your floor space, but your employees will no longer have to find material by digging through dangerous piles. In the end, this greatly increases safety and time optimization. The drawers completely open, allowing you full access to your materials and facilitating handling with a hoist.

Commonly known as bar rack or pipe racks, the Roll Out Cantilever Rack's drawer system is adjustable every 3", allowing you to change your setup according to your needs. You ensure yourself better control of your inventory by utilizing the drawer dividers or the full drawers for short or flexible material. After introducing the Roll Out Cantilever Rack to your workspace, your operations will become more profitable and safer.
