

Efficient. Effective. Essential.

Direct Drive Motor. Green Technology Energizes the Earth and your Business.

EQ SERIES FANS ARE ALSO MADE FOR:

**Dairy Barns
Greenhouses
Horse Stables
Produce Farms**

MOST REFRESHING HVLS FANS IN THE WORLD

Our mission is simple. Manufacture fans that circulate large volumes of air, offering excellent energy and cost savings, coupled with extraordinary performance. This ideology makes our fans the most refreshing, possibly in the world.

FANS IN HIGH PLACES

Our EQ fans are made for Cannabis growing operations. They are cleaner, quieter and more efficient with no maintenance required. The natural airflow from HVLS fans can improve canopy penetration which will produce larger yields. There are many control options available when our fans are tied into your building automation systems. Stay worry free about our fans getting drenched thanks to our IP65-rated motor. We will reduce overall HVAC costs which is a huge win for everyone.

BENEFITS AND FEATURES:

- ❑ IP 65 rating for easy cleaning with water jets
- ❑ Silent operation with gearless motor and custom airfoil design
- ❑ Diameter options from 10 to 20 feet
- ❑ Ideal to integrate with HVAC systems, for energy savings and CO2 emission reduction
- ❑ Maintenance free motor & Robust steel structure for long life
- ❑ Key safety features (main security wire, additional stabilizing cables, hub safety ring)
- ❑ Blades terminals designed to optimize performance and acoustic comfort
- ❑ Hub cover for better aesthetics and protects motor from dust
- ❑ Simple electrical connections
- ❑ Integrated EMC filters to prevent electromagnetic interference from other devices
- ❑ Fans are suitable for operating temperatures up to +50°C
